

Ultimate Transcontinental Overland Motorhome

The EX 480 is the ultimate long haul vehicle for exploring the most remote areas, and for long-term overland worldwide travel.

The habitation cabin is built onto a Mercedes Atego 1023 all-wheel drive truck, mounted onto the chassis with a torsion-reducing rail-on-rail system, which provides comfortable driving on asphalt and tracks, while still allowing excellent performance in the most extreme driving conditions.

The EX 480 has excellent road clearance and departure angle, low ratio gears, and will overcome almost any terrain with ease and confidence.

The EX 480 has a generous sized fixed double bed in the rear, positioned over the expansive garage. A comfortable seating area is located at the front, where seat belts can be fixed, and which also converts into

the second double bed.

A side tailgate can be fitted next to the seating area, to provide a versatile high level viewing platform, while seated in the comfort of the cabin.

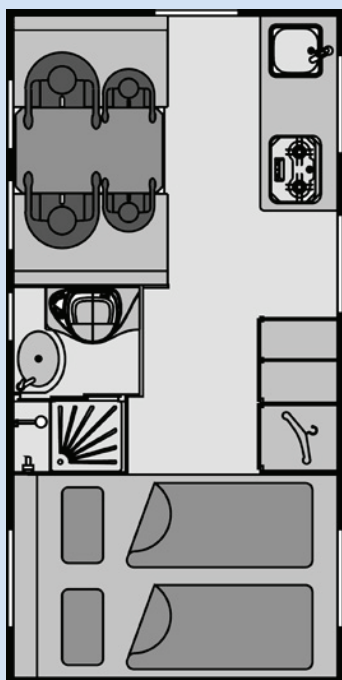

This extremely practical vehicle is fitted with a compressor refrigerator. The kitchen area comprises a sink with mixer tap for hot and cold water. There is a generous sized bathroom with a separate shower, which includes a sink and wc. The EX 480 has ample storage space throughout. The vehicle comes fitted with large fresh water tank and large auxiliary battery as standard, and can be fitted with almost any additional equipment you may desire to make your overland journey as comfortable as you like.

Other layouts, dimensions and base vehicles are available on request.
